Art Unit: 1755

Applicants' remarks and amendments, filed on May 16, 2007, have been carefully considered. Claims 1 and 4-9 have been canceled; no new claims have been added.

Claims 10-22 remain pending in this application.

### ***Withdrawn Rejection***

The 102(b) rejection of claims 1 and 4-9 as being anticipated by Cohen et al. (U. S. Patent No. 5,202,101) stated in the previous Office Action has been withdrawn in view of Applicants' cancellation of these claims.

The 103(a) rejection of claim 3 as being unpatentable over Cohen et al. (U. S. Patent No. 5,202,101) stated in the previous Office Action has been withdrawn in view of Applicants' cancellation of this claim.

### ***Allowable Subject Matter***

Claims 10-22 are allowed.

### ***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance:

As stated in the previous Office Action, the prior art of record does not teach or suggest a platinum group metal (PGM) free catalyst composition comprising zirconia-praseodymia or mixed manganese-yttria.

European Patent Nos. 1 374 978 and 1 634 638 disclose the claimed invention, but because these references (1) were each published after Applicants' effective filing date and (2) are the same inventive entity as that of the instant application, is not qualified as prior art under 35 U.S.C. 102.

Nakatsuji (U. S. Patent No. 7,175,822) discloses a catalyst structure for the catalytic reduction of nitrogen oxides, said structure comprising an outer layer catalyst component comprising (a) ceria or (b) praseodymium oxides or (c) at least one of a mixture or a composite oxide of at least two elements selected from cerium, zirconium, praseodymium, neodymium, gadolinium, and lanthanum, and a second catalyst component comprising (d) at least one catalyst component selected from rhodium, palladium, and their oxides.

The structure also comprises an inner catalyst layer, which comprises at least one catalyst component selected from platinum, rhodium, palladium, and their oxides.

The catalyst structure of Nakatsuji is not platinum group metal free (PGM-free).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
